

Assignment 2

Due: 11:59 PM, 9/25/2022

1. Show that non-singular $n \times n$ real matrices with matrix multiplication is a group.
2. Given two permutations $[0 \rightarrow 1, 1 \rightarrow 2, 2 \rightarrow 0]$ and $[0 \rightarrow 1, 1 \rightarrow 0, 2 \rightarrow 2]$, their composition is another permutation $[0 \rightarrow 0, 1 \rightarrow 2, 2 \rightarrow 1]$. Show that permutations over n elements with composition is a group.
3. Show that $p(x) = x^4 + x^3 + x^2 + x + 1$ is an irreducible polynomial for $F_2[x]$.
